Carson Wu

Enthusiastic and driven Software Developer with a strong focus on multi-modal AI systems, computer vision, and natural language processing (NLP). As an aspiring tech innovator currently entering Form 5, I am passionate about applying artificial intelligence and software engineering to solve real-world problems. I am eager to leverage my hands-on experience in open-source development to contribute to impactful smart city technologies and team success at Autotoll.

September 2022 - Present

Secondary School Student (Entering Form 5)

NLSI Peace Evangelical Secondary
School

- C, Python, Dart, Swift
- AI/ML Architecture
- Computer Vision & NLP
- Embedded Systems & Robotics
- 3D CAD & UI/UX App Design

2024 - Present

Open Source Developer

GitHub Community

- **Heracles V6 Humanoid Robot (Open-Source CAD & Hardware):**
 - Engineered a bionic humanoid platform with decentralized computing (dual Raspberry Pi + 13 Arduino Mega controllers) and COM/COP active balance safety.
- **L.E.P.A.U.T.E. Framework (Open-Source Vision Pipeline):**
 - Built a real-time spatial vision pipeline using **Lie Group $SE(3)$ representations** and zero-shot classifiers for multi-threaded camera tracking.

2026

Project Developer

Hong Kong ICT Awards (HKICTA) - AR Heritage

Projection

Conceptualized and researched an Augmented Reality (AR) projection system aimed at revitalizing historical landmarks as an entry for the HKICTA. Focused on the intersection of smart city innovation and cultural preservation, exploring interactive UI/UX designs and projection mapping concepts to enhance public engagement.
